### [Jet Audio's Stand Alone Complex](#)

“‘Stand Alone Complex’ contains 14 original tracks all produced by Jet, featuring many appearances by artists that comprise the makeup of the emerging New York City music scene. His intention was to create music that captures the minds of today’s new-New York scene, but also has the ability translate universally.

“A ‘Stand Alone Complex’ is an occurrence or mass hysteria for which nobody knows it’s true origin. I think it’s a testament to the careers of everyone on the project, including myself, because everyone here is quickly emerging and progressing. Nobody knows or understands why, but at the end of the day, we’re here, and not going anywhere.”
